

TS-D1000 Series

Digital Conference System

TS-D1000 Series

TS-D1000 series is a new generation stand-alone conference system with elegant design and high quality sound. Various functions are provided to facilitate smooth meetings. Up to 246 chairman or delegate units can easily be connected via CAT5 in a simple daisy chain configuration. The built-in feedback supression ensures clear communication.

Choose the accessory to your requirements: The systems can be equipped with different microphones, expanded number of chairman units and with up to 5 sub control units. The MP3-recording function allows to record all conference content. The microphone can be opened by voice activation.

The physical appearance is created to support the purpose of the conference system in an actual conference situation: The operation surface comprises of all essential buttons. This allows users to focus on the speaker. The whole design is made to be extremly unobtrusive, thus not creating a visual distraction for participants.
